What Is Hush?

- x
- y
- z

What Is HushChat?

HushChat is an encrypted chat messaging protocol and decentralized platform. It's ideas are based on Signal Protocol, but without all the bad stuff.

Signal

- Centralized

- Phone Numbers

- Closed Source Server
- Alice

- Bob

HushChat

- Decentralized

- Shielded Addresses

- GPLv3 Free Software

How Is Hush Like Bitcoin?

- No Company, Decentralized Community
- Both have 21M Total Supply
- Both have halvings every four years
- Hush builds on top of Bitcoin Protocol
- Mining works very similar
- Wallet files are very similar
- Compatability at many layers

Finding Sponsors

- Who depends on Git?
- Who has a hiring frenzy?
- Who just got a funding round?
- Who is the "underdog"?
- Ask at other user groups
- Libraries/Community Center/Uni
- Local Mozillians

Meeting Formats

- One Long Talk
- Lots of Small Talks
- Two or three 15/20 minute slots
- Co-hacking
- Social
